

To: District 2184 Parents

From: Sanford Clinic Luverne, District 2184, and the
Luverne Area Community Foundation

Date: September 20, 2017

Subject: In-School Student Flu Shot Clinic

Each year, the flu leads to approximately 36,000 deaths and 200,000 hospitalizations. The best way to prevent the flu is to be vaccinated. Get your child a flu shot!

The time of year is once again upon us to start thinking about protecting ourselves from influenza. We are very pleased to announce that Sanford Luverne Clinic, District 2184, and the Luverne Area Community Foundation will once again be offering flu vaccines to all children enrolled in grades K-12 in the District 2184 school system.

We will bill your insurance for the flu vaccine if you have coverage. However, through collaboration with the Luverne Area Community Foundation, all out-of-pocket and non-insured costs will be covered for these school aged children.

The in-school flu shot clinic will be held on Friday, October 27, 2017.

This year, live influenza vaccine (FluMist) will NOT be offered in the United States. We will be offering only the injectable form of vaccine to our patients. To receive the flu shot, the attached consent form must be completed and returned to the school prior to October 18, 2017.

For more information about this free flu shot clinic, visit the Luverne Public Schools website at www.isd2184.net or call Phillip Paquette, RN, the licensed school nurse at 283-4497 (Elementary School) or 283-4491 (Middle School/High School).

Thank you!
